

## Outpatient Care System

The name of the existing "medical institutions for medical examination and treatment" will be changed to **medical institutions for outpatient services**.

A list of medical institutions will be available at the Medical Examination Information Center

The list will also be published on the Miyagi Prefectural Government's website.

**We aim to establish a system that allows patients to receive medical care at a wide range of medical institutions.**

## Handling of Treatment Costs

The cost of the visit will be covered by normal insurance and

**in principle, there will be a fee you have to pay.**

Partial public financial support will continue

**Up to 20,000 yen per month in public funds for hospitalization medical expenses**

(reduced from the maximum copayment amount under the high-cost medical care cost system)

**COVID-19 medication is fully supported by public funds**

※Until September 2023

# For those with a fever or other symptoms

If you are at high risk or have severe symptoms

After consulting a medical institution over the phone

If you have mild symptoms

Home testing kit is positive

If it is determined hospitalization is required

If your condition worsens

If your condition worsens and you aren't sure what to do

Rest at home

It is recommended that you avoid going out for 5 days after onset of symptoms and for 24 hours after recovery

Hospitalization

Referral to another hospital/ Admit yourself to a hospital

If your symptoms improve

Until 10 days have passed since the onset of symptoms, please cooperate with infection prevention countermeasures such as wearing a mask to avoid passing the virus on to others.

**It is up to the individual to decide whether or not to refrain from going out**

**If you have tested positive**

**In accordance with the law**

**Staying at home**

**Not going to work**

are **not required.**

For 5 days after onset of symptoms and for 24 hours after recovery, it is recommended that you avoid going out. Voluntary infection control measures are recommended for a period of 10 days.

**If you have been in close contact with someone who tested positive**

You will not be identified as a “close contact”

**In accordance with the law**

**staying at home** is **not required.**

Pay close attention to your condition for 5 days. It is possible for symptoms to appear within 7 days, so voluntary infection control measures are recommended.

**Please take voluntary infection control measures such as wearing masks and refraining from contact with people who have a high risk of developing severe symptoms during periods of risk.**

Quarantine facilities will no longer be available and essential goods will no longer be provided by the government. There are no longer any restrictions on going out.

**Quarantine Facilities**

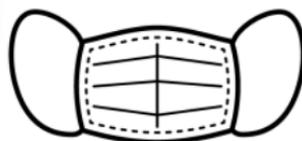

**Providing essential goods**

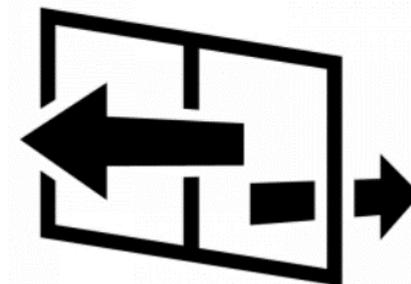

# COVID-19 will not disappear even after being downgraded to a Category V Infectious Disease

**Wearing masks in certain situations**

Mask wearing is left up to individual judgment

**Ventilating air**

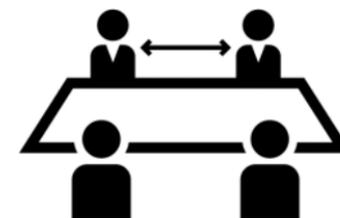

**While not uniformly required, these infection countermeasures are still effective**

**Proper hygiene such as handwashing**

**Maintaining distance from others**

Avoiding the Three Cs

**We ask that individuals and businesses implement these countermeasures at their own discretion.**
